Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 2-9 of the applicants remarks, filed April 7, 2005, with respect to the rejection(s) of claim(s) 1-27 under 102 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Stewart et al, U.S. Patent No. 6,009,091.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7, 10-16 and 18-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Stewart et al (Stewart), U.S. Patent No. 6,009,091.

Regarding claims 1-7, 10-16 and 18-27, Stewart discloses a method for locating a mobile station comprising receiving a plurality of simulcast signals from respective base stations; determining relative time of arrival information for the received plurality of simulcast signals and determining the position of the mobile station (col. 4, line 66-col. 5, line 27). Stewart further discloses OFDM modulation and the transmission of the base station ID in simulcast signals (col. 3, line 64-col. 4, line 4, col. 7, lines 52-57).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stewart and well known prior art.

Regarding claims 8 and 9, Stewart discloses the method according to claim 1 as described. Stewart, however, fails to specifically disclose the various techniques of locating a mobile station such as using GPS and Doppler Shift.

The examiner contends, however, that such techniques are very well known in the art and the examiner takes official notice as such. At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify Stewart with such location determining mechanisms to perhaps improve the accuracy of locating a mobile station in an emergency situation.

6. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stewart in view of Oren et al (Oren), U.S. Patent No. 6,725,045.

Regarding claim 17, Stewart the method of claim 15 as described above. Stewart, however, fails to disclose broadcasting location-specific advertisements.

In a similar field endeavor, Oren discloses broadcasting location-specific advertisements (col. 4, lines 8-13).

Art Unit: 2681

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Stewart with the teachings of Oren in order to notify mobile units of advertisements the mobile user may be interested in.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ruutu et al, U.S. Patent No. 6,442,392, discloses a method and arrangement for locating a mobile station.
